Today's organizations need IT managers and staff who can handle their systems and environments with confidence and experience. Providing competency based training is the first step towards staff enrichment, which leads to organizational efficiency and a staff equipped with knowledge and experience in industry best practices.

CMI University provides world-class technology training from instructors with extensive industry experience who will help drive your technology into the future. With over 20 years' of experience delivering training programs, we understand that everyone's needs are different. We provide cost-effective training solutions delivered to the level and context most suitable for your organization. We offer both standard and custom courses to fit the diverse needs of our customers. Our efforts focus on the success and satisfaction of our students, and we plan for training that is geared towards our customer's environment.

CMI University arms your workforce with the knowledge and skills needed to meet your strategic and tactical goals. CMI University's training courses are designed to help you leverage the power of your CM and ALM best practices and methodologies to drive greater proficiency into your organization, resulting in quality, control, and profitability.

We can help you select a comprehensive training plan, manage your talent, and deliver flexibility with our virtual and instructor-led course options. We offer subject expertise follow-up after each training experience to ensure the training your staff received is helping with skills needed on the job. No matter what your particular area of need, CMI University will provide quality training programs to fit the needs of your organization.

CMI University is committed to providing world-class training and an exceptional educational experience.
